

# COVID-19 Screening for Parents

Every morning before you send your child to school please check for signs of illness:

**FEVER 100.4\* OR CHILLS**  
 \*our school board policy if threshold is lower\*

**SORE THROAT**

**COUGH\* OR SHORTNESS OF BREATH**  
 \*especially new onset uncontrolled cough

**DIARRHEA, NAUSEA OR VOMITING, ABDOMINAL PAIN**

**HEADACHE\***  
 \*particularly new onset of severe headache, especially with fever

**NEW LOSS OF TASTE OR SMELL**

\*May present with more than one symptom. This list does not include all possible symptoms.

**1** Does your child have any sign of illness above?

**2** Were you in close contact (within 6 feet for more than 15 minutes) with anyone confirmed with COVID-19?

**3** If the answer is **YES** to any of the questions, **DO NOT** send your student to school. Instead, begin isolation of your child and contact your healthcare provider. Have you been tested for COVID-19? Only a positive test or provider diagnosis can confirm if someone has a current infection.

**4** Please keep your student home until they meet the criteria on the chart on back of the page.

**5** If you have trouble breathing, chest pain, new confusion, inability to wake or stay awake or bluish lips or face

**CALL 911!**

# COVID-19 SCHOOL ATTENDANCE QUICK REFERENCE

Close Contact	Symptoms	Test status*	GUIDANCE
YES	YES	POSITIVE**	10 days isolation + 24 hours fever free without without fever-reducing medication and symptoms improved. Quarantine siblings, household members and close contacts
YES	YES	NEGATIVE*	Quarantine for 14 days from last date of exposure to + person AND 24 hours fever free with symptoms improved. If new symptoms, need reevaluation. Consider quarantine for siblings and household members if there is suspicion for COVID-19.
YES	YES	PENDING	Isolate at home until results back AND Quarantine for 14 days from last date of exposure to + person^^ Consider quarantine for siblings and household members if there is suspicion for COVID-19.
YES	YES	NOT TESTING†	Quarantine for 14 days from last date of exposure to + person or Isolate for 10 days until fever free with symptoms improved, whichever is longer.
YES	YES	ALT DX w/note***	Quarantine for 14 days from last date of exposure to + person^^ AND 24 hours fever free with symptoms improved AND any additional criteria by healthcare provider.
YES	NO	POSITIVE**	10 days isolation from date test was collected + 24 hours fever free without fever-reducing medication and symptoms improved. Quarantine siblings, household members and close contacts.
YES	NO	NEGATIVE*	Quarantine for 14 days from last date of exposure to + person^^
YES	NO	PENDING	Quarantine for 14 days from last date of exposure to + person^^
YES	NO	NOT TESTING†	Quarantine for 14 days from last date of exposure to + person^^
NO	NO	PENDING	No exclusion until test becomes positive
NO	NO	NEGATIVE	NO EXCLUSION
NO	NO	POSITIVE**	10 days isolation from date test was collected + 24 hours fever free without fever-reducing medication and symptoms improved. Quarantine siblings, household members and close contacts.
NO	YES	ALT DX w/note***	May be able to attend school if COVID-19 test is negative AND any additional criteria by healthcare provider
NO	YES	NOT TESTING†	10 days isolation + 24 hours fever free without meds and symptoms improved.
NO	YES	PENDING	Isolate at home until results back Once have results, refer to appropriate guidance.
NO	YES	NEGATIVE*	May be able to attend school if 24 hours fever free with symptoms improved AND any additional criteria by healthcare provider Do not return to school
NO	YES	POSITIVE	10 days isolation + 24 hours fever free without meds and symptoms improved. Quarantine siblings, household members and close contacts.

\*Test status: documentation of negative test results must be provided before entry to school.  
 \*\*People with positive test results will be contacted by the state Department of Health and contact tracing will be done.  
 \*\*\* If an alternate diagnosis has been determined by a health care provider, a note that includes the date and contact information for the provider must be provided before entry to school.  
 ^^Start date of quarantine is determined by last date of exposure to a positive or untested person. For families who are not able to isolate from everyone else at home, this may be after the ill person completes their 10 days of isolation.  
 †For persons opting to not get tested, they will be treated the same as the scenario for a person who has tested positive. Do not need to quarantine if tested positive in the last 90 days unless new symptoms appear.

**Individual is NOT a known close contact to a COVID-19 case:**

**Symptomatic**

- The individual must remain home for at least 10 days since the first symptoms began AND be fever free without the use of fever-reducing medications for 24 hours AND with improvement of symptoms.
- If diagnosed with another condition that explains the symptoms, such as ear or bladder infection, individual does not need to isolate, doctor's note required to return to school.
- Consider quarantine for siblings and household members if you have significant concern for COVID-19.

**No Symptoms**

- May attend school.

Not tested for COVID-19

The individual must be fever free for 24 hours without the use of fever-reducing medications and improvement of symptoms. If diagnosed with another condition that explains the symptoms, such as ear or bladder infection, individual does not need to isolate, doctor's note required to return to school. Please provide proof of negative COVID-19 test (in a laboratory).

May attend school.

Tested and positive for COVID-19

- The individual must isolate at home for at least 10 days since the first symptoms began AND be fever free without the use of fever-reducing medications for 24 hours AND with improvement in symptoms.
- Repeat testing is NOT recommended for making decisions about when people can return to work or school.
- Siblings, household members, and other close contacts should follow the close contact chart below.

- Must isolate at home for 10 days after the day the sample was collected.
- Siblings, household members, and other close contacts should follow the close contact chart below.

**Individual IS a known close contact to a COVID-19 case:**

**Symptomatic**

- Because the individual is a close contact of a COVID-19 case, the individual must quarantine for at least 14 days after the last contact with the COVID-19-positive person.
- Because the individual has developed symptoms and has not been tested or have an alternate diagnosis, the individual is likely a case and must also remain home for at least 10 days since the first symptoms began AND be fever free without the use of fever-reducing medications for 24 hours AND with improvement of symptoms.
- The criteria in both of the above bullets must be met before returning to school which ever is longer.
- If the individual cannot properly isolate away from others at home, the last date of contact may be the last day of isolation for the positive person.
- Since the individual is a close contact who is now symptomatic, siblings, household members, and other close contacts should also follow this chart to determine quarantine length.

**No Symptoms**

- Must quarantine for 14 days from the date of last exposure before returning to school or day care. Siblings do not need to quarantine.
- If the exposure is to a household member and the case cannot properly isolate away from others at home, the last date of contact may be the last day of isolation for the positive person.
- If an individual who is a close contact becomes symptomatic, refer to the symptomatic scenarios.

Not tested for COVID-19

The individual must quarantine for 14 days after contact with the COVID-19-positive person, even if the student has an alternate diagnosis for symptoms. If still symptomatic after the 14 days, individual must wait to return to school until fever free for 24 hours without the use of fever-reducing medications and improvement of symptoms.

Tested and positive for COVID-19

- The individual must isolate at home for at least 10 days since the first symptoms began AND be fever free without the use of fever-reducing medications for 24 hours AND with improvement in symptoms.
- Repeat testing is NOT recommended for making decisions about when people can return to work or school.
- Siblings, household members, and other close contacts should also follow this chart to determine quarantine length.
- If the close contact tests positive, isolation starts on the day of symptom onset and isolation may end prior to the last day of quarantine or after the 14 days of quarantine.

- Must isolate at home for 10 days after the day the sample was collected.
- Siblings, household members, and other close contacts should follow this chart.
